

Video Phone Sharing With Your Laptop

Vista Users:

- Right click the 2 small computers at the lower right of your screen.
- Click on **Network and Sharing Center**
- Click on **Manage network connections**
- Right click on **Wireless Network Connection** or your Aircard, usually in the “Dial-up” section)
- Click on **Properties**
- Click on the **Sharing** tab
- Check the box that says “Allow other computer users to connect through this computer”
- Select “Local Area Connection” in the **Home networking connection** drop-down
- (If you are using an Aircard: Click on the **Security** tab. Make sure the options are set to **Typical**)
- Click **OK**
- Plug the Ethernet cable into your laptop and video phone
- Turn on your Video Phone

XP Users:

- Left click on **Start**
- Click on **Control Panel**
- Click on **Network Connections**
- Right click on **Wireless Network Connection** or your Aircard, usually in the “Dial-up” section)
- Click on **Properties**
- Click on **Advanced**
- Check the box that says “Allow other computer users to connect through this computer”
- Select “Local Area Connection” in the **Home networking connection** drop-down
- Click **OK**
- Plug the Ethernet cable into your laptop and video phone
- Turn on your Video Phone

Note: You must have an internet connection for this to work. Your phone will not boot up unless you have a minimum of 128 kbps of upload. Speed test at (www.speakeasy.net). You must repeat the steps anytime you are connecting to different network than the one you shared on originally. Repeat the same steps for a wireless card. Right click the card instead of the built in wireless. Phone should take no longer than 1 minute to boot up.

Video Phone Sharing With Your Laptop

Mac Users:

- Go to the apple on the top left and click
- Open **System Preferences**
- Open **Internet & Network** and then the **Sharing** folder
- Click on the **Internet** tab
- Look for "*Share you connection from...*". Select the location you are receiving internet from (ex. WiFi or Airport, Bluetooth, Aircard, etc...)
- Then in the bottom where it says "*To computers using...*" select "*Built-in Ethernet*".
- When all that is done click on **Start** where it says internet sharing.
- Plug the Ethernet cable into your laptop and video phone
- Turn on your Video Phone

Note: You must have an internet connection for this to work. Your phone will not boot up unless you have a minimum of 128 kbps of upload. Speed test at (www.speakeasy.net). You must repeat the steps anytime you are connecting to different network than the one you shared on originally. Repeat the same steps for a wireless card. Right click the card instead of the built in wireless. Phone should take no longer than 1 minute to boot up.
